

DEF-002	Error 500 After Unpublishing a Product Attribute
Module / Page	Admin Panel - Product Card - Attributes
Priority / Severity	Critical
Preconditions	There is a product in the Admin Panel. The product has several attributes (for example: color, size).
Steps to Reproduce	1. Go to Admin Panel → Product Card. 2. Unpublish one of the attributes. 3. Open the same product on the website.
Expected Result	The product page opens. The unpublished attribute is hidden from users.
Actual Result	The product page shows Error 500.
Business Risk / Impact	Product page is broken. Users cannot buy the product. SEO and sales are affected.
Environment	Stage environment. Example: Windows 10, Chrome.
Evidence	
Fix / Retest Ideas	Try unpublishing different attributes (key and non-key). Check if the error happens on all products. Verify logs for error details.
